Reg. Nr. L10675, Wet Nr. 36 van 1947
'n Klair om te gebruik, nie-vlugtige, nie-afstotende gel-aas insekdoder vir die beheer van miere in tuine.

IRAC INSEKDOER GROEPKODE 4A

Aktiewe bestanddeel:

Imidakloprid (Neonicotinoid) 0.1g/kg

RELEVANT SUBSTANCES

Component	%
imidacloprid (ISO), 1-(6-chloropyridin-3-ylmethyl)-N-nitroimidazolidin-2-ylidenamine	< 1
Bronopol	< 1

DIRECTIONS FOR USE: Use only as indicated.

Use instructions: Apply where there is presence of ants. In areas where its presence is suspected or detected sporadically, is recommended for bait box inside. Outdoors, place the gel in drops or thin lines in the ants nests or in its trails. Apply where there is presence of ants when their presence or activity is suspected. Whenever possible, it is desirable to remove other near food sources in order not to interfere consumption of gel.

Intended uses: SHARDA ANT GEL is designed for the controlled placement of bait in the following situations:

Outdoor use:

- Black ants, others: 1 drop of gel directly into the tunnel entrance or application paths. Apply drops of gel having a diameter of about 1 cm (approximately 0.2 g)

Or

- Place approximately 5 g bait in a suitable container (e.g. an old lid) next to the ant nest. Cover the container with a suitable stone in such a way as to provide free access for ants to the container. Inspect the container at weekly intervals and replenish the bait when necessary.

SHARDA ANT GEL must not be contaminated with other insecticides or placed on freshly sprayed surfaces.
