- Handle with care.
- Poisonous when swallowed or inhaled.
- May irritate skin, eyes and cause skin sensitization.
- Do not use on edible crops, foodstuffs or surfaces on which food is handled or stored.
- Poisonous if absorbed through the skin, swallowed or inhaled
- Toxic to bees fish and other aquatic organisms and wildlife
- Store in a cool place away from food and feed.
- Keep the product in its original packaging out of the reach of children and pets. Under these conditions, SHARDA FLY SPRAY 10% may be stored for 4 years.

Respect the uses, doses, conditions and precautions on the packaging which have been determined based on product characteristics and applications for which it is recommended. The treatment should be performed according to good practice taking into account under your responsibility all the specific factors that may be involved and are beyond our control (materials used, application conditions, product mix, etc.)

Although this remedy has been extensively tested the registration holder does not warrant that it will be efficacious under all conditions because the action and effect thereof may be affected by factors such as abnormal soil, climatic and storage conditions; quality of dilution water, compatibility with other substances not indicated on the label and the occurrence of resistance of the pest against the remedy concerned as well as by the method, time and accuracy of application. The registration holder furthermore does not accept responsibility for damage to crops, vegetation, the environment or harm to man or animal or for lack of performance of the remedy concerned due to failure of the user to follow the label instructions or to the occurrence of conditions which could not have been foreseen in terms of the registration. Consult the supplier in the event of any uncertainty.

PRECAUTIONS

- After using SHARDA FLY SPRAY 10% and before eating, wash your hands and skin with soap and water.
- Do not apply the product in surfaces where food is

- stored, prepared or consumed.
- Protect food, cooking utensils and cutlery from contamination during application.
- Do not apply the product in areas accessible to children or animals.
- Do not contaminate ponds, waterways or ditches with the product or empty packaging.
- Wear protective clothing when handling concentrate or diluted chemical.
- Wear a face shield when applying the spray mix.
- Avoid contact with the skin and wash spillages from skin immediately.
- Wash with no abrasive soap and water after use or accidental skin contact.
- Wash contaminated clothing daily.
- Do not smoke, eat or drink whilst mixing or applying chemical, before washing hands and face.
- Avoid spray drift onto surrounding areas and fishponds
- Rinse container three times with a volume of water equal to a minimum of 10% of that of the container. Add rinsing's to the contents of the spray tank before destroying the container.
- Destroy empty container and never re-use for any other purpose.

First aid:

Change contaminated clothing. After skin contact: Wash skin with soap and plenty of water immediately. After eye contact: Wash eyes thoroughly with water. Consult an ophthalmologist. After swallowing: Call a doctor immediately. Symptomatic treatment is recommended.

Mode of action:

The active ingredient, imidacloprid, acts by binding to the insects neurons. This binding causes a disturbance in the transmission of nerve impulses which is lethal to the target insect. The product contains the pheromone cis-tricos-9-ene, attractive to flies. The product is easy to apply and provoke fast knockdown. The product contains denatonium benzoate, a bittering agent which helps to prevent ingestion by children, non-target animals and pets.

IMPORTANT:

USE INSECTICIDES WITH PRECAUTION. BEFORE USE, READ THE LABEL.

DIRECTIONS FOR USE USE ONLY AS DIRECTED

PEST	DOSAGE	REMARKS
House Fly and Stable fly Spray application	Pour 10 g of Fly Spray 10% in 200 ml of water	Mix well and let stand at least 15 minutes. Through pressure pump, apply the solution 7-8 hours maximum after its preparation on non-porous surfaces in high surfaces such as walls, joists, pipes... where flies usually lay or hanging on in Cardboards.
Paint application	Pour 10 g in 150 ml of water.	Mix well and let stand at least 20 minutes. Apply the solution with a paint brush directly high on walls, window ledges, etc.in stripes of 15x30 cm, or on cardboard sheets 7-8 hours maximum after its preparation on non-porous surfaces where Flies usually lay.

The product shall be applied to an effective surface of 1 m² per 100 m² floor surface to be treated. Tip: Add moisture (water) when the product has dried to enhance its activity.

Intended uses: For indoor use on livestock premises such as broiler and breeding houses, livestock barns, dairy parlours, caged layer houses and small animal husbandry such as kennels, etc., commercial/industrial and public areas such as hospital wards, hotels, public baths, municipal buildings, churches, halls, community centres, cinemas, etc., and Domestic environments such as rooms where household wasting is stored.

Remarks: Apply only in empty premises or in places where direct or indirect contact with people/animals is not likely. Do not apply in areas where regular cleaning can move the bait to the surfaces that come into contact with foodstuffs. Do not apply in areas regularly cleaned with water as the washing can remove the deposit. Do not apply in areas recently sprayed with insecticide. Do not spray insecticide on the granules. The application on textile may cause discoloration.
